Dear Sir/s,

I am to refer to the orders issued in the Government letter No. 1932/36-El.(C), dated the 9th February 1949 and to request you that all applications (including those for temporary supply) should be submitted for the orders of Government through the Electrical Commissioner with the Government of Bombay.

2. The applications for the supply of power of 10 KW and above should however continue to be submitted through the bulk suppliers, who will transmit them to Government through the Electrical Commissioner, with their remarks for orders.

Yours faithfully,

Dear Sir,
Dear Sirs'

I am to state that in respect of requisitions made in connection with the lighting leads, Orders on which are still pending, Government is pleased, to permit you until further orders, to connect the lead upto. 5 KW only in the cases of consumers, who have no existing leads at all or whose requisitions for additional lead do not exceed. 5 KW including the original connected lead, profided the consumers show their willingness in wirting to accept that much lead.

2. You are accordingly requested to deal with such requisitions so far held in suspension by Government in respect of the demand made by the consumers in excess of.5 KW.

3. These Orders do not apply to requisitions on the Supply Companies, applications for which have not so far been submitted to Government for its orders .

Yours faithfully,

'*We refer you to the following orders passed by you in regard to reconnections:-

Order No. 1932/36-El.(II) of 23/4/46.

An industrial consumer can be reconnected if the requisitioning consumer was himself the consumer of supply at the time of its disconnection and requisition is capable of fulfilment within 30 days of disconnection.

Order No. 3902/36-E.(II) of 1/10/46.

(c) Any requisition for the resumption of a supply made within six months of its discontinuance, where the requisitioning consumer was not himself the consumer of the supply at the time of discontinuance.

Order No. 3002/36-El(II) of 13/1/47.

Permission is granted to reconnect without reference to Government domestic and lighting loads, provided requisitions are made within a period of six months from the date of disconnection.

We should like to know if an industrial consumer applies for reconnection within a period of six months and if the applicant himself is the original consumer, whether we are justified in reconnecting the supply without reference to you. We shall be glad to have your lucid instructions in this regard at an early date."

Letter No. P-Con-1/6683
Electric Grid Offices,
Foreshore Road,
Bombay 1: 14 April,1950.

To

The Secy. to Govt.,
Public Works Department,
Bombay.

Subj:- Control over supply of electricity from the Tata-G.I.P. Interconnected system.

Applications for power supply from the Tata-G.I.P. interconnected system are at present being routed through this office as per orders contained in Government letter No. 1932/36-EI (c) dated 29/6/49. This decision was taken by Government in view of the power shortage in Bombay area which came to the notice of Government in about June 1949. As it was known that the power supply situation was far from satisfactory and that there was actually a very acute shortage of power, necessitating continuance of staggering of textile mill and other large industrial loads, it was then suggested by me that a strict control may be maintained from the point of view of availability of power on the release of power for domestic as well as industrial purposes. Government accordingly decided that release of power should be sanctioned after all applications are scrutinised in this office and recommended in the light of the availability of power.

2. This purpose has been served till now by the above procedure. Circumstances have since considerably changed. Government appointed the Power Shortage Committee in September 1949. This Committee made certain recommendations in its report after examining the technical aspects of the situation and Government have accepted most of its recommendations and issued orders accordingly. The distributing licensees of Tatas have now been delegated with powers to connect domestic leads and ---

and temporary loads for lighting purposes within certain limits. Government have also appointed a Standing Advisory Committee as proposed by the Power Shortage Committee to scrutinise all applications for supply of power for industrial purposes and recommend their cases to Government, keeping in mind the availability of power from the interconnected system.

3. In view of the above it now appears that the present method of routing all application, through the Electrical Commissioner, is no longer necessary as all the applications are to be referred to the Standing Advisory Committee for their scrutiny and recommendations. It is, therefore, suggested that all distributing licensees of Tatas as well as x Tatas may be requested not to forward these applications to me but to forward them direct to Government. Applications for power will no doubt be referred by Government to the Advisory Committee. As regards applications for domestic use beyond the limits prescribed in the delegation of powers to the licensees and temporary supplies for large lighting and /or motive power purposes, they may be considered in the P.W.D. direct without any reference to me. It is, however, suggested that I may be furnished with a copy of Government orders together with copies of the applications sanctioning release of power for lighting as well as motive power purposes for my information and record so that I may keep myself in touch with power position in the Bombay Area.

I shall be obliged for early order of Government.

Sd/-

Electrical Commissioner,

with the Government of Bombay.

1932/36/2885/29856

El.Br.(II). P.W.D.

Submitted.

2. For the reasons explained in this letter, the El.Commr.. suggest that the distributing of Tata's and the Tata's may be requested to forward applications direct to Government for orders and if the prepesal is agreed to, he may be furnished with copies of applns. for the informations and record, so that he can keep himself in touch with power position in Bombay and allied area..

3. .It is for consideration whether the procedure suggests by the Commr. may be accepted.

Id/-
26/4/50.

There is no objectionto the prepesal in para 3 of the Elec. Commr's letter. The Tata's and their licencee may be asked to send the applications direct to g Govt. This would delay in the dispesal of applns. Any important cases will be referred to the Elec.Commr. for his remarks, if found necessary.

Id/-
27/4/50.

I agree. We have delegated to licenses power to sanction ordinary cases. Special cases above will come to from in future. Policy applicable to such cases is now more or less settled. and the doubtful cases can be referred to the standing adv. Com. Remarks of the Elc.Commr. are therefore not necy., they can be requested on special occasion.

Id/-
17/4

El.Commr.'s report is as per further side hind 'A' by me on page 3. He has not asked for applications for 'Remarks' but copies thereof for record to his office along with the orders thereon.

Id/- 28/4

Discuss with H.M. who agrees, that (i) copies of sanctioned applns. be sent H.M. the Elec. Commr. and (ii) this remark may be called in special cases.

Dt. (Bills No. 1);
11th July 1950

To

The Administrator,
Savanur Municipality,
Savanur (M.S.M.Rly.)

Sub: Curtailment of supply in the event of break-down of generating plant.

Dear Sir,

With ref. to your letter No. 4222, dt. 23-6-50, a copy of G.L. No. 4932/36-El(II), dt. 31-8-1948, is enclosed.

2. As regards your request for relay... I am to request you please to specify the exact documents reqd. ...

DA: Copy of ... letter.

...

Copy of demi-official letter No. 3085/PSF/50 dated the 16th May 1950, from the Honourable the Finance Minister of Govt. of India, addressed to the Honourable Shri B.G.Kher, Chief Minister of Bombay.

"As you are aware, the Rehabilitation Finance Administration was set up in June 1948 for the purpose of giving financial assistance to displaced persons on reasonable terms in order to help to settle them in business or industry. The Provincial Governments were requested in the Finance Ministry's letter No. D. 11026-FI/48, dated the 4th Septr. 1948, to issue instructions to the local authorities that the persons who are given loans by the Administration should be granted priority in the matter of business premises and housing accommodation, and that such persons should also, where necy., be given every possible assistance in securing the wherewithal to start their business or industry. The request was reiterated in this Ministry 's subsequent letter No. F. 11(31)-FI/48, dated the 9th November 1949, when it was brought to our notice by the Rehabilitation Finance Administration that not only did the majority of their borrowers settled in different Provinces still continue to experience difficulties and delays in securing the requisite facilities but that in a number of cases premises already allotted or electric connections already given were withdrawn by the State authorities after the loan money had been paid out by the Administration, thus adding not only to the borrowers, difficulties but also endagering the safety of the Government money. Complaints continue, however, to be made both in Parliament and outside that the requisite measure of assistance from the States is not forthcoming and the Rehabilitation Finance Administration have also represented that the results have been disappointing.

2. ---

2. The Administration is rendering valuable service in the permanent rehabilitation of displaced persons, but is obvious that their further success in this direction depends upon the co-operation and assistance of the States and their officers, since loans granted by the x Administration become infructuous if the borrowers are unable to secure, speedily and without having to pay black market rates, the means necy. for setting up their business or industry. We are not unmindful of the difficulties of the States and importance of rehabilitation of displaced persons, every effort has to be made to extend to such persons whatever facilities are possible and I shall be grateful if you could find it possible to have a directive issued for according priority to the Rehabilitation Finance Administration bowrowers in the matter of their primary needs.

3. The main requirements of the borrowers are of courses:-

(i) Premises,
(ii) Quotes of controlled commodities,
(iii) Power connection, and
(iv) Licences,

and f the following suggestions in regard to these have been made by the Rehabilitation Finance Administration.

(i) Premises. The borrowers from the Administration should receive preference in the allottment of evacuee shops and industrial establishment, other things being equalx xtxtx States which have taken up schemes for the construction of shops and residential houses for displaced persons, against paymentx in a lump sum or in instalments, should allow the borrowers of Rehabilitation Finance Administration to participate in those schemes along with others but with a priority of allottment over others x in case of equal claims. Where no vacant premises are available, the State Government may explore the possibility of requisitioning before refusing the borrower's request. It may be made a practice that a borrower is not evicted from the business ---

business or industrial premises arranged by him through his own efforts or allotted to him. If, however, eviction becomes unavoidable, sufficient notice may be given to the occupant and alternative premises provided on top priority basis. Evacuee industrial establishments are probably allotted for a period of five years only. If this is so, their borrowers should not be turned out after the expiry of this period simply on the troup that a competitor is prepared to pay a higher rent.

(ii) Quotas for controlled commodities. Steps may kindly be taken to ensure that the Administration's borrowers receive top priority in the matter, and that quotas are not cancelled without sufficient reasons. In cases where cancellation of quotas becomes necy., a fortnight's notice in advance may be given to the Rehabilitation Finance Administration to enable it to take timely steps to safeguard its position vis-a-vis the loans.

.....

(iii) Electric power. The suggestions in (ii) above equally apply in this case. It is very desirable that power connections granted to the borrowers are not restricted to night use. Expreience has shown that for working a factory at night time substantially higher labour charges have to be incurred and newly-started industries working under this handicap can seldom run successfully, because of competition of established concerns having day-connections and consequently working with lower costs.

(iv) Licences. The loanees of the Administration may kindly be given more liberal treatment in this matter, and the extension of the date of licences should not be refused to them if within the prescribed period the beneficiary has not been able to utilise his licence because of the delay in his securing premises or the loans applied for from the Admi-

Administration.

4. These facilities appear to us to be very reasonable and would go a long way to meeting the difficulties of the borrowers and at the same time ensuring the repayment of Government's money. We trust that the State Government will be able to see their way to granting these facilities. We suggest also that, with a view to better co-ordination, the States may accept senior officers of the Administration, whose names and specimen signatures the Administration would furnish to the State Government concerned, as liaison-officers between them and the Administration.

.....

Copy of a demi-official letter No. R-104/2144-C, dated the June 1950 from the Honourable Chief Minister of Bombay, addressed to the Honourable Shri C.D.Deshmukh, Minister of Finance, Government of India.

.....

*Please refer to Dr. Matthai's demi-official letter No. 3085/PSF/50, dated the 16th May, 1950, regarding the facilities to be made available to displaced persons who have been given loans by the Rehabilitation Finance Administration.

2. Copies of the Government of India, Ministry of Finance, letters, dated the 4th September 1948 and the 8th November 1949, referred to, were forwarded to all concerned for information and guidance, with instructions that the persons who were given loans may, as far as possible, be granted priority in the matter of allotment of business premises and housing accommodation and that they may also, where necessary, be given every possible assistance in securing the wherewithal to start their business or industry. There are, however, certain difficulties in this connection which are explained below:

(1) ---

(i) Premises: Though it is settled policy in this State not to resort to requisitioning of premises save for public purposes, we have, nevertheless, where vacancies of shops, godowns, etc. are reported, been allotting them to deserving displaced persons as a special case. In the case of allotments of evacuee properties, the rule is that these are allotted to the first informant, if he is otherwise suitable and deserving. Subject to this, preference is given to the displaced persons granted loans by the Rehabilitation Finance Administration or by the State Government, and a substantial number of such allotments have actually been made.

We agree that a borrower should not be evicted from the business or industrial premises arranged by him through his own efforts or allotted to him, but each case will have to be dealt with on merits. If, however, eviction becomes unavoidable, sufficient notice will be given to the person concened if it is not possible to procure alternative accommodation for him.

(ii) Quotas of controlled commodities. The allocation of iron and steel for fabrication purposes is generally made to the displaced persons who were already in the trade before displacement and were getting quotas of the material from the Government of India direct or from the Provincial Governments in Pakistan regularly. But a small quantity has also been reserved for new comers. If the Government of India were to sanction an increase in our quarterly quota and we have been moving them for this greater help could be rendered in this matter.

Supplies of maida and sugar, amongst other controlled commodities greatly in demand, are not adequate at present to

present to meet all requirements, but we are taking as liberal a view as possible. The suggestion that, in cases, in which cancellation of quotas becomes necessary, a fortnight's notice may be given to the Rehabilitation Finance Administration, is acceptable to us.

(iii) Electric Power: Special consideration is being given to those who obtain loans. We are, however, not finding it possible, in the present circumstances in Bombay, Poona, etc., to give day to day connections in all cases. We are, in such case, prepared to offer power after 3 p.m. and have informed all concerned accordingly. The prudent rule for the Rehabilitation Finance Administration to follow would be to ascertain from the state authorities concerned whether electric power or other controlled resources are likely to be available in a particular case, before a loan is sanctioned. The procedure now adopted puts the cart before the horse and seeks to present us with a fait accompli. We shall be grateful if necessary instructions in this matter are issued to the Rehabilitation Finance Administration.

(iv) Licenses are granted for (a) stall, (b) food grain ration shops, (c) catering establishment (i.e. food grain permits for hotels) and bakeries.

As regards stall, there is no objection to give preference to those who have been given loans, and this is in fact being done. In other cases, permits are being granted to those who had licenses for such businesses in Pakistan. The number of permits in these cases is, however, very limited, and it is desirable that the Rehabilitation Finance Administration ascertain in advance from the State authorities whether applicants for loans for these purposes are entitled to such permits and whether permits are available for allottment before loan is sanctioned in any such case.

Application for Electric Power for Industries.

Details to be furnished by all applicants for power supply for industrial purposes who have entered into commitments and ordered or installed machinery.

(Note.A separate form of application is prescribed for those whose leads have been sanctioned but not connected.)

1). The name of the Electric Supply Company.

2. Full name and address of the applicant.

3. Full address at which power supply is required.

4. The nature of industry and brief details of the type and quantity of production proposed to be undertaken at the factory.

5. Details of land and building acquired and the date of such acquisition.

6. ---

6. Has the permission of the Municipality been obtained? If so, when?

7. Number of workers proposed to be employed in the factory.

8. Power applied for:
   Connected load .....kW.
   Maximum Demand(Estimated) .....kW.

9. If the applicant has an existing load from the Electric Supply Company, give details of -
   (a) Existing connected load in kW.
   (b) Actual kW. maximum demand during each of the last 3 months.

10. State whether power is required for running the existing machinery or for new and or additional machinery.

11. State whether the new and/or additional machinery has been ordered and/or received and/or installed. Give dates of order, receipt and installation, or the dates of receipt of machinery and installation.

12. Necessary proofs for the above, such as copies of invoices, import license, delivery vouchers, etc.

13. Whether supply at night (10-30 p.m. to 7 a.m.) would be acceptable to the consumer, in the first instance, if supply during 24 hours is not available.

14. Whether any alternative source of supply (e.g. oil engine, steam) is available. If so, the details should be given.

15. I declare that the above information is correct to the best of my knowledge.

(The above information should be furnished in quadruplicate through the Electric Supply Company concerned who will forward it to Government with its remarks:

Warning:-

Electric power, if sanctioned and supplied to the applicant, is liable to be cut off if any of the details furnished as above is found to be incorrect or any essential information is found to have been withheld.)

To,
The Under Secretary to the Govt.
of Bombay P.W.D.
B O M B A Y.

Dear Sir, Re:- Curtailment of Supply in the event of a breakdown of the Generating Plant.

With reference to your reminder dated 14-4-50 on the above subject we have to inform you as follows :---

(1) At present our connected load for Lighting is 650 K.W. which with the Water Works pump gives us a maximum demand of 450 -- K.W. We have stopped giving new lighting connections, for the present.

(2) We have at present four Generating sets viz 2 of 100 K.W., one of 250 K.W. and 1 of 500 K.W. The total peak load in the evenings is about 430 K.W. to 450 K.W. The 500 K.W. set alone should be sufficient to cope with this load but during summer it was our practice to run one of the 100 K.W. sets in --- parallel with the 500 K.W. set for a couple of hours in the evenings. The exact temperetures on the 500 K.W. set were -- unduly high with 450 K.W. load.

In case of any fault on the 500 K.W. set, the remaining three sets could together take up only 350 K.W. load, necessitating a reduction of 100 K.W. load.

The evening peak load also includes 40 K.W. load of the Water Work pump, and a 35 K.W. load of the six Cinema Houses in Town, and about 25 K.W from the Wanless Sanatorium on the Miraj Road. The last named consumer has a small generating set of their own and they can partly meet their lighting requirements by running this set.

The Water Works and the six Cinema Houses can also be stopped till 9-30 p.m. (first shows) without much inconvenience to the Public.

So in case of ncessity due to failure of our 500 K.W. set, we -- would arrange to shed ~~down~~ the load of the water works, cinemas & Wanless Wadi, leaving undisturbed the supply in the town to all other consumers.

If any of the smaller sets is also out of service at the same time, we shall to resort to stopping supply in different sections of the town by rotation.

Yours faithfully,
P. Limaye.
